Hearing Statement on “Problem analysis follow-up: proposed solutions”

On 5 September 2014 the Departmental Forum (DF) at the Department of Economics and Business discussed the report with proposed solutions to the problem analysis follow-up.

The DF would like to express its satisfaction with the report and feels that the report and suggested actions are positive. We interpret the report as a direction for less centralization and more downsizing in the central administration in general and hope that this interpretation is correct.

We also would like to point out that the actual implementation of the many decentralization suggestions is unclear and thereby it is hard to see what the concrete implications will be. Moreover, as the discussion of a possible reorganization of the departments is still unfinished and will have an impact on the organization of the administration, we suggest that there will be a short hearing round when the concrete implementation has been decided.

Best Regards

Lars Relund Nielsen
Deputy chairman
Departmental Forum at the Department of Economics and Business
