THE ROYAL DANISH LIBRARY IS LAUNCHING A NEW LIBRARY SYSTEM

On the 19 November 2019, the Royal Library will launch a new library system with a new user interface and some altered, or completely new, functionalities.

Note that during the implementation of the new system, certain library services will be shut down:

- The old system will be closed for loans, reservations, renewals and returns on Friday 15 November at 18:00.
- Via AU Library’s website, it will still be possible to search for material and access electronic resources.
- Inter-library loans (loans from external libraries) will not be possible for a period – at least 5 weeks from the changeover date. So remember to make any reservations in due time, ideally prior to 1 October.

- Users are encouraged to store any items currently on their personal 'To do list' elsewhere (e.g. in a reference management tool), as this facility will not be transferred to the new system
- In the new system, all users will need to be created anew - with a new PIN code.

Status updates and other information about the new library system will be published via the link below:

CLOSE YOUR WINDOW BEFORE YOU GO HOME

The caretakers and the security company G4S have caught us forgetting to close the windows in our offices and hallways after closing time quite a few times recently.

Thieves may take this as an invitation to break in, and since we have had problems with thieves before, you are strongly encouraged to make sure to close any windows that you have opened during the day – in your office and in the hallways, meeting rooms etc. – before you go home.

Note also that it is a good idea to close the blinds before you go home - especially those of you who have offices on the ground floor.

CULTURAL AWARENESS - LIVING AND WORKING IN DENMARK

The International Academic Staff Services hosts a workshop about Danish culture that aims to equip international employees with practical tools that are useful not only in your collaboration with Danish colleagues and business partners but in many cross-cultural situations.

NORDFORSK CALL - INTERDISCIPLINARY RESEARCH PROJECTS

NordForsk has sent out a call for proposals for their new Nordic programme for interdisciplinary research, which has a budget of NOK 120 million.

The call is specifically aimed at interdisciplinary projects that combine disciplines which rarely collaborate or that pursue an original research question requiring the exact combination of competencies from different disciplines. Projects awarded funding must include at least two of the following three areas: Life Science, Physical Sciences & Engineering, and Social Sciences and Humanities.

The maximum funding per project is NOK 15 million, and NordForsk hopes to fund 8 - 12 research projects under this call. Funding will be granted for up to four years, and successful proposals must include partners from at least three Nordic countries.

The deadline for submitting proposals is 13 November 2019.

THE VILLUM SYNERGY PROGRAMME

VILLUM FONDEN wishes to strengthen new collaborations that combine expertise within computer science with other research areas and thus calls for applications for its Villum Synergy Programme, for which an amount of DKK 50 million is allocated.

Project grants of DKK 2-3 million for up to two years are available for new collaborations. Established collaborations mature enough to benefit from a large grant can apply for a full project grant of DKK 10-20 million for three to five years.

Projects should involve two PIs that are both affiliated with a Danish research institution - One should be a methodological expert from computer science,

statistics or applied mathematics and the other a domain expert from a field of application that may be broadly chosen, e.g. social science.

Deadline is 10 October 2019 at 14:00.

AUFF NOVA GRANTS

The Aarhus University Research Foundation (AUFF) calls for applications for the Nova 2019 funding programme.

The aim of AUFF Nova is to stimulate courageous and innovative research projects of high quality – projects which may have difficulties obtaining alternative funding. The project must be pioneering in its field and show clear potential for scientific breakthroughs. The hypothesis or problem behind the project may require development of new methods and it may challenge existing paradigms. If relevant, multi-disciplinary elements and synergies within the research team(s) should be clearly identified.

The programme includes two types of grants:

- Small projects (up to DKK 600,000) with a duration of 1-2 years
- Large projects (up to DKK 3 million) with a duration of 3-4 years

The deadline for applications is 4 October at 12 noon.
